

# The Brickman Team

## ABOUT THE BRICKMAN TEAM

The Brickman is a team of skilled LEGO® brick artists and craftspeople led by Ryan McNaught.

Ryan and his team have built some of the world's largest and most detailed LEGO brick models. Having produced 6 globally touring exhibitions and hundreds of models for museums, galleries and shopping locations around the world, there really isn't anything that they cannot make out of LEGO bricks.

Over the years Ryan and his team have won many awards for their works and they maintain a unique style which makes their creations some of the best and most recognisable in the world.

Based in Melbourne Australia, The Brickman team is looking forward to hearing from you with your ideas and inspirations for how you think LEGO bricks can be involved in what you do.

## COMMISSIONS

We offer a variety of services, such as:

- LEGO models and sculptures
- Architectural models
- Private commissions
- Events and exhibitions
- Appearances and media

The LEGO Group are very particular about what products and brands they will associate with. This means that if your project involves a brand or product then the model will need to undergo an approval process with LEGO to ensure the project meets their brand guidelines.

## EXHIBITIONS

Over 2 years, 6 million LEGO® bricks and 10,000 build hours have gone into the creation of **Jurassic World by Brickman**, making it the biggest exhibition we've ever created! Inside our latest exhibition you'll encounter over 50 large-scale dinosaurs, minifig dioramas and photo opportunities to recreate some of the most iconic moments from the films. You'll build your own mini Jurassic World, dinosaur footprints, create hybrid dinosaurs, help assemble enormous LEGO brick mystery mosaics, and even build your own escape vehicles to get away from our 1 tonne T.rex!

**Brickman Cities** for the first-time ever, features a brand-new collaboration with LEGO® CITY! Our LEGO brick experience focuses on some of the world's greatest cities, explores their history with LEGO bricks and then invites you to build them into the future with millions of LEGO bricks! This experience is a smaller, more intimate and immersive one than our other exhibitions, with a focus put on learning and play rather than large scale sculptures.

**Brickman Awesome** showcases the tallest LEGO® model in the Southern Hemisphere – a NASA SLS rocket standing at a whopping 7.5m tall and built from more than 450,000 bricks! The exhibition is made up of 35 of our biggest builds featuring a 2.5m tall Orca, the DeLorean from the Back to the Future movies and the world's first life-sized LEGO Harley Davidson!

With more than 50 awe-inspiring models, **Brickman Wonders of The World** takes visitors on a hands-on journey around the world and through history. Some of the models showcased include a giant LEGO® Arc de Triomphe, LEGO Empire State Building with King Kong, LEGO Big Ben and a LEGO Leaning Tower of Pisa!

**The Brickman Experience** collects together 60 original LEGO® brick models along with their own unique behind-the-scenes story, including original drawings and sketches. It had sell-out tours all across Australia and New Zealand, South America and the UK! Stay tuned to find out where we're heading next!

**Towers of Tomorrow** with LEGO® bricks features some of the most iconic and eye-popping towers from across Asia & Australia including the amazing and self-contained city that is China's Shanghai Tower.

Built for Sydney Living Museums and currently on tour around the USA thanks to Flying Fish Exhibits!

Coming 2022

Our brand-new exhibition will be released in 2022 to accompany our latest book *The Bricktionary: The Ultimate LEGO® A-Z!*
